## MONTHLY LIST OF PUBLICATIONS AND MOTION PICTURES\*

NOVEMBER 1949

**INSTRUCTIONS:** Not more than five publications will be sent free. Technical publications and those marked "Restricted" are furnished only to applicants whose activities justify such action. Foreign correspondents as well as persons not qualified for technical material should address requests, together with their remittances, to: Superintendent of Documents, Government Printing Office, Washington 25, D. C. Foreign correspondents should also add one-third of the cost of publication to defray postage charges.

Publications will reach you sooner if you use the label attached to page three.

If you have changed your address show your old address as well as the new one when you request that our records be changed.

### BULLETIN OF THE MONTH

#### "How to Use Whole and Nonfat Dry Milk" Agricultural Information Series 86

Dry milk products are excellent foods that can help families get enough milk for good health. Methods of using milk powder in recipes calling for fluid milk are given.

### AGRICULTURAL INFORMATION SERIES

**How to use whole and nonfat dry milk.** Mary T. Swickard. Bureau of Human Nutrition and Home Economics. 32 p. (IS 86.) Price 10¢. *See above.*

### FARMERS' BULLETINS

**Logging farm forest crops in the Northeast.** Fred C. Simmons. Forest Service. 57 p., illus. (F 2008.) Price 20¢.

Many farmers ask: "What's the best way for me to log my wood lot?" They want to know about the equipment and methods that will make the job easier and more profitable. The questions show a growing need for some easy-to-use information on the subject. This bulletin will tell you how you can harvest the timber crops from your wood lot with the equipment you already have or can acquire. It deals only incidentally with methods of forest management.

### AGRICULTURE INFORMATION BULLETINS

This new series is to contain subject matter of interest to people and groups throughout the American public, urban as well as rural. It will include most publications previously issued in the Miscellaneous Publication series and also some publications of the type formerly issued in the unnumbered series and reports to the public on special subjects.

**The balance sheet and current financial trends of agriculture, 1949.** Bureau of Agricultural Economics. 51 p., illus. (AB 1.) Price 15¢. **FOR SALE ONLY.<sup>1</sup>**

This is the fifth of a series of annual reports which are designed to carry forward the comparative balance sheet of agriculture since 1940. Each balance sheet is as of January 1 of its year. This is not a balance sheet of farm operators, nor of people living on farms, nor of landlords. Rather it is a balance sheet of the industry viewed as one large enterprise.

\*Compiled by Eleanor W. Clay, Office of Information.

## CIRCULARS

The farm real estate situation, 1947-48 and 1948-49. W. H. Scofield and R. D. Davidson. Bureau of Agricultural Economics. 40 p., illus. (C 823.) Price 10¢.

This "Farm Real Estate Situation" report is the nineteenth in a series that extends back to 1926. Like previous issues, it is concerned with developments taking place during the farm real estate year which ordinarily covers the 12-month period ending about March 1. Although this report covers the 2-year period March 1947 to March 1949, the main emphasis is on the year ending on the latter date.

## MISCELLANEOUS PUBLICATIONS

Preservation of agricultural specimens in plastics. G. R. Fessenden. Bureau of Agricultural and Industrial Chemistry. 78 p., illus. (M 679.) Price 25¢. FOR SALE ONLY.<sup>1</sup>

Procedures on the preservation of natural color in plant specimens mounted in plastic plates and the embedment of biological specimens in plastic blocks are outlined. The subject matter contained in this publication is based mainly on the development work on specimen preservation carried out in the United States Department of Agriculture. Consideration has, however, also been given to the published results of other workers in the field.

A graphic summary of world agriculture. Reginald G. Hainsworth. Office of Foreign Agricultural Relations. 51 p., illus. (M 705.) Price 30¢. FOR SALE ONLY.<sup>1</sup>

This publication contains a series of maps and graphs showing the geographic distribution of agricultural production and trade, world population, and such physical factors as land forms, vegetation, soils, and annual rainfall.

### MOTION PICTURES

The Motion Picture Service, Office of Information, U. S. Department of Agriculture, produces and distributes motion pictures on subjects with which the Department is concerned. They are both sound and silent and are released in 16-mm. and 35-mm. widths. Films in the 16-mm. size are available from State film libraries; 35-mm. films are available only from Motion Picture Service. They are lent to responsible agencies and persons or may be purchased outright. Prints of Department films may be obtained from 72 cooperating film libraries in the 48 States, and the Territories of Alaska, Hawaii, and Puerto Rico.

**A TREE GROWS FOR CHRISTMAS.** 1 reel, 16 mm., sound, color. Running time, 11 minutes. Released 1949.

This film tells the story of the Christmas tree in history and legend and the Christmas tree industry of today. It also shows that cutting of trees for decoration is not a wasteful practice, on the contrary, when properly done it is a good forestry practice. The film shows how the trees are cut and marketed and the proper method of handling the tree after it is brought home. The picture ends with a short sequence on trimming the tree for Christmas Day. (Not in Film Libraries; available from regional offices of the Forest Service at Missoula, Mont.; Denver, Colo.; Albuquerque, N. Mex.; Ogden, Utah; San Francisco, Calif.; Portland, Oreg.; Philadelphia, Pa.; Atlanta, Ga.; Milwaukee, Wis., and for sale.)

**KILLING WEEDS WITH 2,4-D.** 2 reels, 16-mm., sound, color. Running time, 16 minutes. Released 1949.

This film is designed to give you facts you should know about 2,4-D to use it safely. It tells how wheat, rice, and corn among other crops may be weeded with this chemical. Proper mixtures and spraying techniques are explained. Many common weeds are shown before and after spraying. (Not in Film Libraries; available for sale only.)
